Quantitative trading: Are algorithms the future of financial markets?

Thursday, December 12, 2024 | 3:16 PM

[Watch Now](#)

Generative AI is rapidly lowering the barriers to entry, allowing small funds and even retail quants to run financial markets?

You may have heard the term 'quant' in the world of trading and investment, but what does it really mean?

Despite the opportunities this revolution offers, it also carries significant risks.

In this episode of Money Code, we will delve into the world of quantitative trading, which relies on algorithms and mathematical models to analyze markets and make decisions

Guest of the episode:

QuantInsti, co-founder Nitish Khandewal
